# 2-digit addition

Add two 2-digit numbers mentally

Challenge

1

Choose from these numbers and make up ten addition calculations. Write them out below.

Example  $23 + 16 = 39$

Challenge

2

Choose from these numbers and make up ten addition calculations. Write them out below.

Example  $55 + 38 = 93$

Challenge

3

Choose from these numbers and make up ten missing number calculations below. Choose one number for the answer and a lower number to start the calculation. Work out the missing number.

Example  $65 + 28 = 93$

1  +  =

3  +  =

5  +  =

7  +  =

9  +  =

2  +  =

4  +  =

6  +  =

8  +  =

10  +  =

Explain to someone at home how you add 2-digit numbers together.

Then, on the back of this sheet, write four calculations for them to work out using your method.
