Volume of cuboids

Calculate the volume of cuboids using the rule $V = lbh$

Each cuboid is made with 1 cm^3 cubes.

- For each cuboid:
 - write its length, breadth and height in the table
 - calculate its volume in cubic centimetres (cm^3).

Cuboid	Length (cm)	Breadth (cm)	Height (cm)	Volume (cm^3)
A	1	2	1	2
B				
C				
D				
E				

- Look for a pattern in the table above. Use the pattern to find the volume of the next two cuboids, F and G, in the sequence. Complete the table below.

Cuboid	Length (cm)	Breadth (cm)	Height (cm)	Volume (cm^3)
F				
G
