

Name: _____ Date: _____

Find the mean scores

Calculate the mean as an average of a set of data

You will need:
• scissors

- Cut out the 20 cards below.
Shuffle the cards and place them face down on the table, making five rows of four cards.
- Turn over the cards in the first row.
Find the mean score of your cards by:
 - finding the total of the four cards
 - dividing the total by four.

Example

2 4 7 9

$$2 + 4 + 7 + 9 = 22$$

$$22 \div 4 = 5.5$$

Record your numbers and answers in the grid below.

- Repeat Step 2 for each of the remaining four rows of cards.

Row	Cards				Total	Mean
Example	2	4	7	9	22	5.5
1						
2						
3						
4						
5						

1	2	3	4	3
6	4	8	5	10
6	12	7	14	8
16	9	18	10	20
