# Halving to find division facts (2)

Use halving to recall the division facts for the 8 multiplication table

- Write the total number of chocolate pieces under each array.
- Share half. Write how many are left. Share another half. Write how many are left. Share half again. Write how many are remaining.
- Write a division fact for each array using the 8 multiplication table.

## Example

$\div 2$     $\div 2$     $\div 2$

40   20   10   5

$40 \div 8 = 5$

1

$\div 2$     $\div 2$     $\div 2$
