Perimeter search

Calculate the perimeter of shapes that can be split into rectangles

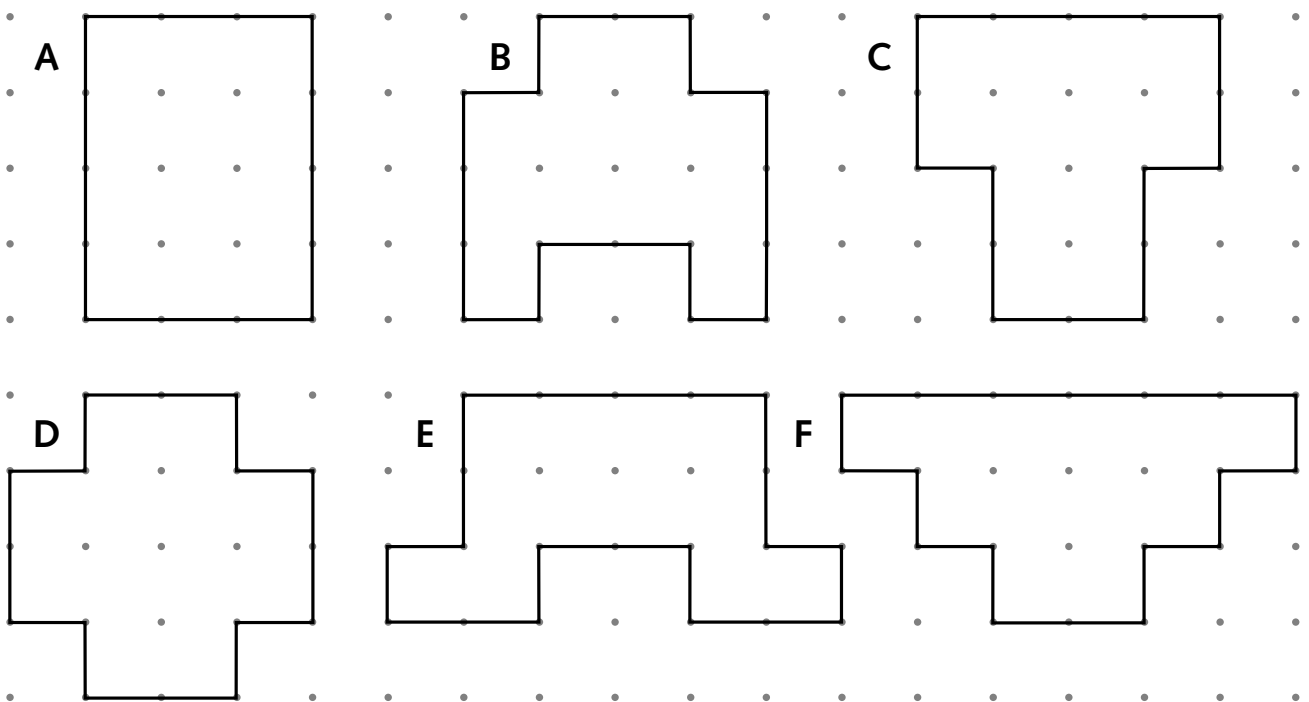

You will need:

- scissors
- ruler
- 1 cm square dot paper

1 Cut out the four L-shapes at the bottom of the sheet.

Make each polygon in turn with four L-shapes.

Draw the outlines of the L-shapes on each polygon.

2 Complete the table.

Polygon	A	B	C	D	E	F
Perimeter (cm)						

3 Arrange the L-shapes to make three different polygons.

Draw each polygon you make on 1 cm square dot paper and record its perimeter.
