

Christian Values

As a Church of England primary school, we have a clear commitment to promoting a Christian ethos within the school and our curriculum. We provide opportunities for children to develop their knowledge and understanding of Christianity and to understand and respect different religions, beliefs, values, traditions and worldviews.

Healthy habits

Our school understands how physical and mental health supports learning and our children's futures. We prioritise the development of healthy habits for everyone and dedicate time in our busy school-life to develop children's appreciation and knowledge of how they can form healthy habits.

Active learning

Our curriculum is designed to support pupils in taking an active role in their learning. We encourage children to ask questions, to retrieve and link prior and new learning, to discuss ways of solving problems and to take part in their learning journey.

Our Place in the World

This driver is divided into six of our eight Golden Threads which are used to guide children through their learning as they create meaningful links across subjects and year groups.
